```dart
import 'package:flutter/material.dart';

void main() {

runApp(MyApp());

}

class MyApp extends StatelessWidget {

@override

Widget build(BuildContext context) {

return MaterialApp(

title: 'DeepFake Detector',

theme: ThemeData(

primarySwatch: Colors.blue,

),

home: DeepFakeDetectorScreen(),

);

}

}

class DeepFakeDetectorScreen extends StatefulWidget {

@override

_DeepFakeDetectorScreenState createState() =>
_DeepFakeDetectorScreenState(); }

class _DeepFakeDetectorScreenState extends State <{

// You would need to implement the necessary logic for deepfake detection
here

@override

Widget build(BuildContext context) {
```

```dart
return Scaffold(
  appBar: AppBar(
    title: Text('DeepFake Detector'),
  ),
  body: Center(
    child: Column(
      mainAxisAlignment: MainAxisAlignment.center,
      children:<Widget> [
        Text( '
Upload an image or video for deepfake detection',
          textAlign: TextAlign.center,
        ),
        // Add file upload button or camera access here
        ElevatedButton(
          onPressed: () {
            // Implement the logic to detect deepfake and display results
            // Example: showResult('Deepfake detected!');
          },
          child: Text('Detect Deepfake'),
        ),
      ],
    ),
  ),
);
```

```dart
}
// Example method to show detection results
void showResult(String result) {
showDialog(
context: context,
builder: (BuildContext context) {
return AlertDialog(
title: Text('Detection Result'),
content: Text(result),
actions:<Widget> [
TextButton(
onPressed: () {
Navigator.of(context).pop();
}, child: Text('OK'),
),
],
);
},
);
}
}
```
